

*91*  
*cont.*  
(D) a radical generator,

wherein each of Component (B) and (C) has a content of an alkylene (having from 2 to 4 carbon atoms) oxide adduct of bisphenol A (average added number of mols: 1 to 10) of 8-40 mol% based on an amount of constituent monomers of each of said Components (B) (C).

*92*  
9. (Amended) A molding composition consisting essentially of:

- (A) an aggregate; at least one of
- (B) a linear unsaturated polyester and
- (C) a linear unsaturated polyester polyamide; and
- (D) a radical generator,

wherein each of Component (B) and (C) has a content of an alkylene (having from 2 to 4 carbon atoms) oxide adduct of bisphenol A (average added number of mols: 1 to 10) of 3 to 40 mol% based on an amount of constituent monomers of each of said Components (B) and (C)

and wherein component (B) has a softening point of 80°C to 130°C.

Please add the following new claims:

*D3*  
--11. (New) The molding composition of claim 9, wherein component (C) has a softening point of 80°C to 130°C.--

--12. (New) The composition of claim 1, wherein the polyester resin has a softening point of 93°C or above.--

Attached hereto is a marked-up version of the changes made to the application by this Amendment.
